

Design The Window Of Your Dreams

A Guide

By Gomm Stained Glass, LLC

Step 1 – Research For Your Window Design.

Some people call their file of ideas “scrap.” Flipping through magazines, Pinterest, Pattern Books, Web Sites and Blogs will give you a place to start.

Here’s a link to Our Pattern Books

<https://www.gsg-art.com/store-books.html>

Now .. get your pencil out, glass patterns are simple lines and curves, so you don’t have to have a fine art degree to sketch a design. Look at photos, calendars or real life to play with your ideas.

You can visit places in your area where stained glass is on display, like the library or a public building, maybe at art shows. Study what you love about the design to help you with your own piece.

Step 2 – Where Does Stained Glass Go?

Be Creative, Stained Glass looks gorgeous in a window so walk around and see which windows would be good for glass. Or how about hanging a window on your wall? People put windows in their doors and the sidelights next to them and they sometimes hang them on a front porch.

Here's a list of places to spark your imagination:

*Hall or Closet Door,

*Sidelights,

*Transoms,

*Bathroom Cabinet,

*Room Divider,

*Lamps,

*Picture or Mirror Frames,

*Outdoor Address,

*Spa Windows,

*Skylights

* Kitchen Cabinets

Step 3 – Do I Have A Style?

Ask yourself some questions

- Do I like straight lines or curvy lines?
- Do I lean towards simple or lots of pieces?
- Do I want bright colors or no color at all?
- Do I have personal or family symbols I would like to include?
- Am I more comfortable in a rustic or formal room?
- Is there a particular era that speaks to me?
 - Victorian
 - Edwardian
 - Mission Style
 - Art Nuevo
 - Prarie Style
 - 60's (See Peter Max)

Step 4 – Work With An Expert
